

NETGEAR Enterprise switches for SMEs

The right switch for your business. Enterprise-class switching without enterprise complexity.

Your switch is the foundation of your network. It connects devices, supports critical applications, powers your WiFi infrastructure, and helps keep employees and customers productive.

Choosing the right switch means finding the right balance between performance, flexibility, and simplicity. NETGEAR Enterprise offers a complete portfolio of unmanaged, smart, and managed switches designed for small and medium-sized enterprises. Whether you're building a new network, upgrading your infrastructure, or preparing for future growth, NETGEAR gives you the capabilities you need without the complexity you don't.

Built for today and ready for what's next

The best switch isn't necessarily the one with the most features. It's the one that's right for your business today and ready to support where you're headed next. The right solution delivers the performance, reliability, and scalability you need without the cost or complexity of enterprise features you'll never use.

With the right switch, you can:

- Keep employees, customers, and critical applications connected
- Deliver fast, reliable connectivity for WiFi 6, 6E, and WiFi 7
- Power access points, IP cameras, and VoIP phones with PoE
- Eliminate network bottlenecks with multi-gig and 10G connectivity
- Simplify network management with centralized cloud visibility
- Scale your network without replacing your infrastructure

The best network is one that fits your business. A switch solution designed for your needs keeps things running smoothly today while giving you the flexibility to grow tomorrow.

Choose the switch that fits your business

Unmanaged switches: Simple, reliable connectivity

Get reliable plug-and-play connectivity with no configuration required, making it easy to connect your business and get to work

Ideal for:

- Small offices
- Remote offices
- Basic network expansion

Key benefits:

- Plug-and-play installation
- Fanless options for silent operation
- Desktop and rackmount models
- Gigabit and multi-gig options

Smart switches: More control as your business grows

Gain greater visibility and control with simple, browser-based management that helps your network keep pace as your needs evolve

Ideal for:

- Growing businesses
- Retail
- Hospitality
- Branch offices

Key benefits:

- VLAN support for traffic segmentation
- Quality of Service (QoS)
- Link aggregation
- PoE+ and PoE++ support
- Browser-based management
- Support for NETGEAR Insight on select models

Managed switches: Advanced networking for growing businesses

Deliver enterprise-class performance, security, and scalability for growing businesses and mission-critical environments without enterprise complexity

Ideal for:

- Multi-site organizations
- Education
- Healthcare
- Professional services
- MSP-managed networks

Key benefits:

- Advanced Layer 2 and Layer 3 features
- Multi-gig and 10G performance
- Advanced security and resiliency
- Extensive PoE options
- Centralized cloud management with NETGEAR Insight

Support the speed your business needs

As wireless speeds increase and more devices connect to the network, switching performance becomes critical. NETGEAR Enterprise switches provide the bandwidth and flexibility needed to support WiFi 7, cloud applications, video collaboration, storage, and AV-over-IP.

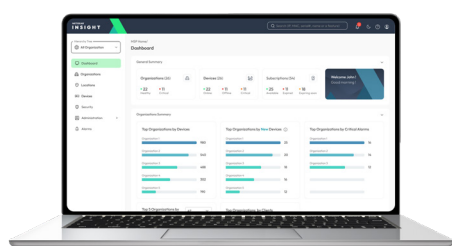

NETGEAR Enterprise switches offer:

- 1G Gigabit Ethernet
- 2.5G and 5G multi-gig
- 10G Ethernet
- 25G, 40G, and 100G uplinks on selected models

A smarter way to manage your network

Compatible switches can be managed through [NETGEAR Insight](#), giving you complete visibility across your network from a single cloud-based dashboard. Monitor performance, deploy new devices with Zero Touch Provisioning, troubleshoot remotely, and manage multiple locations without requiring a dedicated network engineer.

With proactive alerts, NETGEAR Insight helps identify potential issues before they become disruptions. Built-in security features, including port security, 802.1X authentication, and VLAN segmentation, help protect every connection.

The NETGEAR Enterprise advantage

NETGEAR Enterprise delivers the performance, flexibility, and simplicity businesses need to build reliable networks today and scale for tomorrow.

- Complete networking portfolio for small and medium-sized enterprises
- Unmanaged, smart, and managed options
- Multi-gigabit and 10G connectivity
- Flexible PoE solutions for connected devices
- Cloud management with NETGEAR Insight
- Full Layer 2/3 feature set, redundant uplinks, and advanced QoS — enterprise headroom without enterprise complexity
- Solutions that scale with your business
- No per-feature licensing fees, just the network you need

Your next-generation network starts here

Whether you're upgrading your infrastructure, deploying WiFi 7, supporting new applications, or expanding to new locations, NETGEAR Enterprise provides switching solutions designed to keep your business connected and ready for what comes next.

Explore [NETGEAR Enterprise switches](#) today and find the right solution to support your network now and as your business grows.
