The NETGEAR Insight advantage

NETGEAR Insight 10.0 helps IT teams and MSPs deploy, manage, and scale networks with less complexity and greater visibility. A transparent single-tier subscription covers every managed device on your account, eliminating hidden costs and simplifying network operations.

As networks grow across more locations, devices, and users, IT teams need a simpler way to maintain consistent performance and visibility. NETGEAR Insight 10.0 provides a centralized cloud platform that helps teams manage distributed networks more efficiently from anywhere.

Streamlined workflows, automated onboarding, and centralized administration help IT teams deploy networks faster and manage them more efficiently. A 50-device site can be operational in an afternoon, while role-based access controls ensure the right people have the right level of access. Intelligent provisioning, visual reporting, and WiFi coverage insights help teams deploy networks faster, identify issues sooner, and maintain consistent performance across every site they manage.

Key features

- Modern, intuitive user experience
- Streamlined single-tier subscription — no tier lock-in
- Simplified two-step customer sign-up
- Accelerated zero-touch device onboarding
- Bulk configuration templates for multi-site deployments
- Intuitive role-based access control (RBAC)
- Map-based visual reporting and enhanced topology views
- WiFi coverage heatmaps with automatic gap detection
- AI-driven network provisioning (in Beta)
- Simplified multi-site navigation
- Real-time network topology visibility manages routers, switches, APs, and PoE consumption
- WPA3 enterprise encryption and VLAN segmentation
- Anomaly detection and VPN management
- GDPR-compliant data handling
- 99.9% uptime SLA with 24/7 cloud DevOps
- Mobile app for iOS and Android

Benefits

Simplified network

Reduce the time and effort required to manage networks with streamlined workflows, centralized visibility, and intuitive reporting. IT teams and MSPs can support more sites and devices without increasing administrative burden.

Built to scale

Grow from a single site to hundreds of locations without increasing management complexity. Flexible administration and a simplified subscription model make it easy to scale as your business or customer portfolio expands.

Smarter network operations

Accelerate deployments and improve network performance with intelligent provisioning and proactive coverage insights. Quickly identify issues, reduce troubleshooting time, and keep users connected with confidence.

Security without complexity

Protect users, devices, and business data with enterprise-grade security built into the platform. Integrated protection and compliance capabilities help reduce risk without adding operational complexity.

Complete network visibility

Gain a clear view of network health across every site, device, and user from a single platform. Location-based reporting helps teams identify, diagnose, and resolve issues faster.

Reliable NETGEAR cloud infrastructure

Keep networks running and users connected with a cloud platform designed for reliability and resilience. Backed by 24/7 cloud operations and a 99.9% uptime SLA, devices continue operating even during temporary cloud disruptions.
